Lung Screening Disclosure and Consent

I voluntarily consent and authorize Front Range Preventive Imaging physicians and technologists to administer the testing required to perform a CT lung scan.

Furthermore, I understand that:

1. The primary purpose of the lung screening is to detect early cancer or other abnormalities when the likelihood of a cure is greater.
2. Although this is an excellent tool, it is not perfect and can miss some abnormalities including cancers at the very early stages of development and should not be considered as a substitute for a complete evaluation by a physician.
3. If an abnormality is found a recommendation for additional tests, including subsequent CT scans may be made.
4. I will be exposed to radiation during the examination.
5. Since CT is very sensitive, it may identify nodules and/or other abnormalities that are insignificant or not cancerous, but may require additional diagnostic tests and/or procedures to evaluate the findings.
6. Such tests and/or procedures may entail additional costs for which I am responsible.
7. Radiology is not a perfect science and it is possible for a radiologist to miss a significant lesion or abnormality by this method.
8. **Front Range Preventive Imaging is not responsible for my follow-up medical care.**
9. **My test results will be made available to the physician of my choice.**

I have been given an opportunity to ask questions about this procedure and the risks and hazards involved and I believe that I have sufficient information to give informed consent. I certify that I have read this form and I understand its contents.

The report for this procedure contains medical terminology that is likely to require interpretation by a physician.

In order to allow patients to take this test, Front Range Preventive Imaging requires that you:
